RULES AND REGULATIONS

Rule 1 - Water Service

(a) Application: Service and supply of water shall be rendered after the signing of an application by the prospective customer and its acceptance by the utility, such application to state fully and truly all the purposes for which water may be required; and after agreement by the applicant to conform to the lawful rules and regulations established by the utility and filed with the Washington Utilities and Transportation Commission (hereinafter referred to as State Commission).

Anyone applying for service after the below effective date will be obligated to take and pay for service for a minimum of six consecutive months whether the service is used for that period of time or not.

(b) Change of Use: The customer will not increase his demand or use of service as stated in his application without giving due notice of such increase. In the event of such increase, the customer will be required to pay the utility's regularly published rates for such increased service and demand from the date of connection and use of the same.

Whenever the customer desires to discontinue the use of water for any special purpose or through any fixtures mentioned in the original application, he shall cause the fixture to be removed and the branch pipe or service supplying the same to be capped or plugged, and shall notify the utility in writing before any reduction in charge will be made. Such a reduction in charge is contingent upon the provisions of the utility's tariff.

(c) Termination of Service: Service will be discontinued upon the customer giving the utility written notice prior to the date of disconnection. The customer will be held responsible for all charges accruing prior to the date specified in the notice, or in case of failure to give notice, then until the water is turned off.

Rule 2 - Services

The pipe and facilities through which water is furnished from the distribution system to each separate building, residence, or summer cottage, tent, camp or group of buildings that is or could be logically served by one pipeline will be considered a service. Only one customer will be permitted on a service except by approval of the utility.

RULES AND REGULATIONS

Rule 3 - Service Connection Charge

See Schedule No. 3

Rule 4 - Reconnection Charge

When service has been discontinued because of delinquent account, request of customer, refusal to make proper repairs or similar cause, a charge of \$45.00 will be made for restoring service, provided the reconnection can be completed within the hours of 8:00 a.m. to 5:00 p.m., Monday through Friday, except holidays. For reconnections requested to be completed during other hours or holidays, the charge will be \$67.50. The reconnection charge shall be paid before service is rendered.

I
C
I

If the utility dispatches an employee to disconnect service and the customer pays the delinquent amount, a charge of \$25.00 will be made for the disconnection visit.

I

No charge shall be made for reconnection of service if the shut-off was made for the convenience of the utility in making repairs, changes, etc.

Rule 5 - Service Connections

The utility shall construct connections of proper size, as determined by the utility, from the distribution mains to the customer's property. The utility reserves the right to refuse to construct a service connection to any property in case a reasonable doubt exists as to the continuity of service, or in case the applicant's pipes are not properly constructed and protected.

Rule 6 - Distribution Main Extension

Where elevation and construction conditions permit and one or more bona fide prospective customers request a main extension, the utility shall construct the same. The cost in excess of the estimated revenue for a period of three years shall be paid by the prospective customers in advance of construction. No extension will be considered as coming under this rule where the ratio of the total cost of the extension to the estimated yearly revenue is greater than six to one.

Subsequent applications requesting service on such an extension within three years after the establishment thereof shall obtain, in writing, from each and all of the original applicants who at the time connected to the extension made under these rules, either:

RULES AND REGULATIONS

ORIGINAL

Rule 6 - Distribution Main Extension (Continued)

- (a) A receipt acknowledging payment of a prorata share of the amount paid on the extension by the original applicants,
or
- (b) A waiver of payment in lieu of receipt under (a);

Provided, however, that when the cost of furnishing such service exceeds the minimum investment required of the utility, then the connection will be treated as a new extension.

Rule 7 - Responsibility for, and Maintenance of, Services

The customer will assume all responsibility on his premises for water supplied by the utility. The utility will be exempt from all liability for loss or damage caused by leakage or escape of water furnished by the utility, after the same has passed the point of the utility's ownership.

All service pipes and fixtures on the premises of the customer must be kept in repair and protected from freezing at the expense of the customer. Where there are leaking or defective pipes or fixtures, the water may be turned off at the option of the utility until the proper repairs are made. The utility may require any service to be equipped with a stop and waste cock to be used during freezing weather instead of permitting the water to be run continuously from faucets.

The utility reserves the right to set meters or other devices without notice to the customer for the detection and prevention of fraud or waste.

Rule 8 - Access to Premises

The utility's regularly authorized agents or employees shall have access to the premises of the customer at reasonable hours for the purpose of meter reading; for the inspection, connection, disconnection, repair or removal of the utility's property installed thereon.

RULES AND REGULATIONS

ORIGINAL

Rule 9 - Interruptions to Service

The utility will make a diligent effort to render uninterrupted service and supply of water; and, in cases where shut-off is necessary for repair, reconstruction, damage prevention or similar cause, the utility will endeavor to give advance notice to its customers of such expected shut-off. However, the utility will not be responsible for any damage which may result from any cessation of service such as above outlined, nor for failure to give notice of shut-off when circumstances are such that it is impossible to give notice as above stated.

Rule 10 - Bills

Bills will be rendered monthly in arrears and are due and payable in full within fifteen days from the issued date. Unpaid bills are delinquent after the fifteenth day.

Rule 11 - Deposits

Rules relating to water companies are provided in Chapter 480-110, Washington Administrative Code (WAC). Rules covering Credit and Deposits are published as WAC 480-110-051, DEPOSITS, and are available upon request.

Rule 12 - Delinquent Accounts and Disconnections

Rules relating to water companies are provided in Chapter 480-110, Washington Administrative Code (WAC). Rules covering Discontinuance of Service are published as WAC 480-110-071, DISCONTINUANCE OF SERVICE, and are available upon request.

RULES AND REGULATIONS

Rule 14 - Installation of Meters (Continued)

A meter will be installed upon any flat rate service at the request of the customer, provided, however, that the actual cost of the meter installation must be paid by the customer at the time of installation and before the water is turned on. The amount so paid will be refunded to the customer by allowing him a credit of one fourth of his monthly bill until such time as the amount as been paid, provided such refund payments do not run for more than three years from the date when refunds began. All meters will be maintained by the utility without cost to the customer.

Rule 15 - Account Service Charges

A service charge of \$17.50 will be made for each new account or change of account responsibility on an existing service. Such charges shall be included in the initial billing to the customer. An additional charge of \$10.00 will be made when the utility must dispatch an employee to establish a base meter reading. Where separate new connections or changes are required for service billed on different account numbers at the same address, the service charge shall be applied to each account, unless service has been separated for the utility's convenience. The service charge shall not apply to the following:

- (a) Installation of a new service;
- (b) When a temporary or seasonal connection or reconnection charge is made;
- (c) When an owner or agent assumes temporary responsibility for service to vacated premises.

A \$15.00 service charge shall be applied to each account for each check returned unpaid for any reason by the bank upon which the check is drawn.

Bills are due and payable upon receipt. Bills are considered delinquent 15 days after the bill mailing date.

A late payment charge of two percent per month on any unpaid balance shall be applied each month to accounts which remain unpaid more than 15 days past the bill mailing date. The minimum charge shall be \$2.00 per month.

RULES AND REGULATIONS

Rule 16 - Property on Public Highways

(T) (M)

All distribution mains and those portions of service connections, exclusive of customer owned lines, in or on streets or public highways will be considered utility property and will be maintained by the utility at its expense.

Rule 17 - General

(T)

All special cases not covered by the foregoing Rules and Regulations will be covered by the special rules to be filed as part of the utility's tariff on file with the State Commission, subject in each case to protest according to law.

The utility hereby adopts and makes part of this tariff the regulations of the State Commission as provided in Chapter 480-110, Washington Administrative Code.
